

Island Program and Storage Solutions

The Viola Park Island Program currently includes three models that allow for a wide range of configurations. Both mobile and stationary models are available and can be optimized for specific functions. All of the islands are delivered either fully assembled or as a simple kit of parts that can be quickly and solidly assembled on site.

The islands can be purchased independently, or as part of a complete kitchen.

For more information, email us at inquiries@violapark.com

Pivot Storage System

Pivot Storage System, a set of pivoting storage elements mounted beneath a worksurface and designed to allow quick and efficient access to specific cooking tools without getting in the way of the cook – while maximizing countertop space.

In-counter Storage Module

The in-counter storage module has compartments for bread, onions, garlic etc. This new product allows ease of access without cluttering the worksurface.
